

NORTH CAROLINA

SNAP-ED PROGRAM RESULTS 2022

WHAT IS SNAP?

The Supplemental Nutrition Assistance Program (SNAP) offers food assistance to millions of eligible (at or below 130% federal poverty level) individuals and families to reduce hunger and help put healthy food on the table.

WHAT IS SNAP-Ed?

The Supplemental Nutrition Assistance Program Education (SNAP-Ed) is the nutrition education program of SNAP. SNAP-Ed equips eligible North Carolinians with knowledge and skills to make healthier choices.

To do this, the North Carolina Department of Health and Human Services, Division of Child and Family Well-Being partners with Alice Aycock Poe Center for Health Education, Down East Partnership for Children, Durham County Department of Health, East Carolina University, North Carolina Agricultural and Technical University, North Carolina State University, Second Harvest Food Bank, the University of North Carolina at Chapel Hill and the University of North Carolina at Greensboro.

In the federal fiscal year 2022, North Carolina SNAP-Ed measured indicators related to healthy eating.

5,693

North Carolinians were surveyed in direct education programs.

AFTER PARTICIPATING IN SNAP-ED PROGRAMS:

Children, teens, and adults ate more than one kind of fruit

Children, teens, and adults ate more than one kind of vegetable

Teens drank more water

Adults drank fewer sugar-sweetened beverages

Adults and seniors ate more cups of fruit

Adults and seniors ate more cups of vegetables

POLICY, SYSTEMS, AND ENVIRONMENTAL (PSE) CHANGES:

Include changes to **formal, written policies, ways in which business is conducted** and **environments** to increase healthy eating and physical activity where eligible North Carolinians eat, learn, live, play, shop, and work.

TOP CHANGES IMPLEMENTED:

MULTI-COMPONENT PSE INTERVENTIONS:

Include either nutritional or physical activity support along with at least one of the following: education, marketing, community involvement and trainings. Multi-component interventions will enhance the impact and sustainability of the healthy changes into future years.

68 sites reported multi-component PSE intervention with a **NUTRITION** component

14 sites reported multi-component PSE intervention with a **PHYSICAL ACTIVITY** related component
